Hi [Redacted],

Thanks for that. Please be sure to provide this info to [Redacted] when you talk today, so he can assess suitability for vaccination use.

Kind regards

Andrew

Hi Andrew

The Pfizer sodium chloride is in a plastic ampoule. I have attached a file containing images of the product.

Best regards

[Redacted]

Thanks [Redacted]

I saw [Redacted] contacted you smartly after I passed your email on. One question from me, is your saline in a vial or ampoule presentation?

Kind regards,

Andrew

Good morning Andrew –

Thanks for your response, I have connected with [Withheld under section 9(2)] directly and arranged a call to discuss the options today.

Best regards

Hi [Withheld under section 9(2)],

Thanks for the thoughts about 0.9% saline for vaccine diluent. The PHARMAC contracted supply will not be used for the vaccine diluent, but the Ministry of Health is working to manage specific supply. I have copied [Withheld under section 9(2)] and [Withheld under section 9(2)] who can reach out to you if they require further information.

Kind regards,
Andrew

Hi Andrew – hope your week has gone well.

Thinking about planning for the C-19 vax roll out, while we're mindful PHARMAC has a contracted supplier for sodium chloride diluent, should it be required, Pfizer also holds some stock of the 0.9% 10mL SKU in New Zealand and we can source further supplies upon notice if necessary.

Please feel free to reach out if we can assist.

Best regards

Withh
