4.2 Project Two

For Project Two, Research Solutions agrees to:

- (a) develop, in consultation with PHARMAC staff, a survey questionnaire which must be approved by PHARMAC prior to being circulated to survey participants. The purpose of the questionnaire is to:
 - (i) identify barriers to identification and treatment of depression by GPs in the primary care setting;
 - (ii) ascertain the level of confidence in providing advice and treatment in relation to depression;
 - (iii) identify the sources of information utilised by GPs to identify and depression and determine the credibility applied to each source;
 - (iv) identify the basis and rationale for selection of pharmaceutical treatments;
 - (v) identify the level of non-pharmacological interventions used and the level of evidence associated with those; and
 - (vi) identify any safety concerns associated with the use of antidepressant medication;
- (b) commencing ^{22 June} ~~13 July~~ 2006, survey 150 GPs from the GP Online Panel using the survey questionnaire outlined in paragraph (a) above; and
- (c) produce and provide to PHARMAC by ^{31 July} ~~24 August~~ 2006 a written report outlining the findings of the survey.
