

Your perindopril is changing

New look for your Coversyl

Since 2021, Coversyl has been dispensed with Canadian packaging. Medsafe had said this could happen until New Zealand packaging was available. New Zealand Coversyl packs are now available.

What's changed?

The tablet is a new colour and shape.

The carton and blister pack that your medicine comes in has changed.

Same medicine inside

The medicine is still the same. It is made by the same company and is approved by Medsafe.

Questions?

Talk to your pharmacist or the person who prescribes your perindopril.

They know you and your clinical history, they can offer you the best advice.

Canadian Coversyl

Green rod-shaped biconvex scored tablets.

New Zealand Coversyl

White rod-shaped biconvex scored tablets.

Not shown to scale
