

Fortisip and Fortisip Multifibre

Price increase

Nutricia, the supplier of the affected nutritional supplements, has increased the cost of these products.

Pharmac, your pharmacist, and Nutricia understand that you may be disappointed that the cost of these products is increasing.

Fully funded options may be available

There are other nutritional supplements available that may be suitable for you.

If you want to try a fully funded option, talk to the person who prescribed your supplements about the best options for you or your whānau.

Why is this happening

Nutricia has told us that it has to increase prices if it is to continue supplying these products to Aotearoa New Zealand.

Like many suppliers, Nutricia has faced increased supply chain costs and global price increases for the materials and raw ingredients used in these products.

Pharmac has worked with Nutricia to keep cost increases to a minimum.

Questions?
