

Carbamazepine (Tegretol) 200 mg

Packaging change

Due to a brief out of stock, your carbamazepine will have different packaging.

Only the packaging has changed

The temporary Tegretol is the **same medicine** and is made at the **same site** as your usual Tegretol.

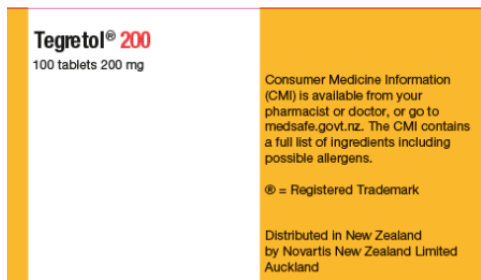

Medsafe has reviewed this product and it has been approved.

Why is this happening

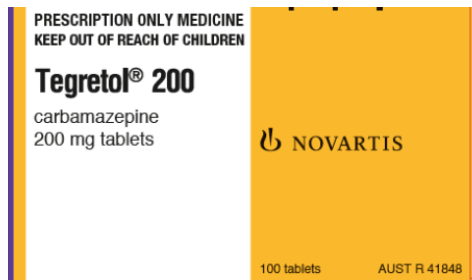

The next shipment of New Zealand-packaged Tegretol brand carbamazepine (tab 200 mg) has been delayed.

The supplier is providing some of their Australian stock to ensure you can continue to access treatment.

New Zealand packaging

Australian packaging
